Since this table was compiled I have received Mr Bhandarkar's *Report of a second tour in search of Sanskrit manuscripts made in Rajputāna and Central India in 1904-05 and 1905-06* (Bombay, 1907). According to inscriptions found by him in certain temples at Jaisalmer, Mulrāj I (No. 21) was succeeded by his brother, Ratan Singh, and they together "righteously protected the earth as did Lakshman and Rāma of old." Mulrāj had a son called Deorāj, the father of Kekar II (No. 24); one inscription mentions him as the chief of the State just after Gharsi (or Ghata Singh), but the popular idea is that he died of fever during the siege of Jaisalmer at the end of the thirteenth century.

(b) Excluding figures for vernacular schools in districts.

For reasons given at pages 374—75 of Volume III-A this table is misleading; the number of schools has certainly increased since 1902, but not to the extent indicated. Prior to 1904, classes or sections of a school were treated as part and parcel of that school, but they have since been shown as separate institutions. For example, the high school, with its special classes for instruction in bookkeeping, *banika* business, the duties of a *patwari*, etc., was formerly entered in the returns as one single school, but since 1904 each such class has been held to be a separate school. Similarly, many of the schools in the districts have long had both Hindi and *banika* classes, but the latter have for the last three years been shown as separate institutions. The schools mentioned in this table are all maintained by the Darbār; there have always been many private ones of the indigenous type, but they send in no returns.

TABLE No. LXVI.

List of schools in the Bikaner State, 1906.

Locality.	Class.	Number on rolls.	Daily average attendance.	REMARKS.
Bhādra	Hindi primary	53	47	All these schools are maintained by the Darbār at an annual cost of about Rs. 51,000. There are in addition numerous institutions of the indigenous type, such as <i>pāth-shālas</i> , kept up by private individuals or communities, but they are not under departmental control. A <i>banika</i> school, it should be explained, is one in which instruction is given in mental arithmetic and the general system of mercantile business and accounts as conducted in Mār-wāri characters. It will be seen that more than half of the boys were borne on the rolls of these <i>banika</i> schools. The girls' school at the capital is the only one of the kind in the State.
